

Bug Report: #1 Unable to exit page

Summary: When trying to exit a page it takes you to another page with the content that the program found.

1. Environment

- **Device/Platform:** Windows 11, Desktop

2. Severity & Priority

- **Severity:** Major (Blocks customers from exiting the website)
- **Priority:** High (Direct impact on performance)

3. Steps to Reproduce

1. Open the program
2. Type "exit" in the options

4. Expected Result

The program should produce a prompt saying to press any key to close the program.

5. Actual Result

The program exits to another page that shows the information taken from the website.

6. Screenshots/Recordings

None provided

7. Additional Context

None

Bug Report: #2 Typed a book name and crashed

Summary: Typed a book and caused the program to crash

1. Environment

- **Device/Platform:** Windows 11, Desktop

2. Severity & Priority

- **Severity:** Major (Blocks customers from using the website)
- **Priority:** High (Direct impact on usability)

3. Steps to Reproduce

1. Open program
2. Type "White Fang"

4. Expected Result

Either pulls up a message telling the user that the book isn't on the site or pulls up the information for the book.

5. Actual Result

Program crashed

6. Screenshots/Recordings

None provided

7. Additional Context

Not sure if it works with other titles.
